

THE ONBOARD BASIC SAFETY TRAINING PROGRAM

INTERACTIVE TRAINING AND TESTING WITH MEMORY-ENHANCING VIDEO

This instructional resource combines broadcast quality video, pictorial workbooks and interactive training to provide vessel operators with a cost-effective means of complying with the drilling, training and assessment requirements established by the International Safety Management (ISM) and Standards of Training, Certification & Watchkeeping (STCW) codes. The audio-visual training course consists of a library of 14 videos and four workbooks covering the requirements established by the STCW Code. Photographed aboard vessels ranging from sea-going tugs and fishing vessels to oil tankers and container ships, the training modules incorporate dramatic emergency scenarios and clearly-illustrated response procedures.

Basic Fire Fighting

Part 1

When you click the links to the left, you're going to be asked to watch a series of videos and answer questions about the content. When you're ready to take the quiz, enter your User Name and I.D. and click Next.

Part 2

To receive your certificate and your score, you have to proceed to the end of the test module and answer all of the questions. A minimum passing score is 75%. The certificate should be signed by you and by your supervisor. Keep it with your personal records in case you are asked to show it later.

Part 3

The Interactive Tests utilize video clips as memory aids to boost retention and help your personnel demonstrate their knowledge and the effectiveness of your training program. Each test requires personnel to review the video training curriculum in very short segments so that retention rates are high. With the video scenes fresh in their minds, even crewmembers with cultural, educational or linguistic challenges have high probability of achieving passing test scores. The result is a win-win-win. The crewmember gets a passing grade and a certificate for his or her personal file. The employer demonstrates that its personnel are retaining vital information and obtains statistical confirmation that its training efforts are working. Auditors see conclusive evidence that the employer is doing its job. The content is SCORM compliant.

THE COST-EFFECTIVE SOLUTION TO STCW/ISM RENEWAL TRAINING REQUIREMENTS

ORDER FORM

Quantity	Title	Price * / Format		Item Total
	Onboard First Aid: Immediate Actions	\$295	DVD/Workbook
